

# Earned Value - GOF Project

Cost Variance:	84.715	(The tasks completed to date have taken 84.7 hours less effort than planned.)
Cost Variance %:	38%	(The tasks completed to date have taken 38% less effort than planned.)
Cost Performance Index:	1.618	(Work is taking less time than planned. For every effort hour actually spent, you are accomplishing 1.618 hours worth of planned results. This usually means that your original effort estimate was too big.)
Schedule Variance:	95.562	(You have completed 95.6 hours more work than you had planned to complete by this date.)
Schedule Variance %:	76%	(You have completed 76% more work than you had planned to complete by this date.)
Schedule Variance Duration:	12.918	(Based upon your current rate of task completion to date, you are 1.85 weeks ahead of schedule.)
Schedule Performance Index:	1.757	(You are completing tasks more quickly than scheduled. For every effort hour of work you should have accomplished to date, you are completing 1.757 hours. This may mean that your original planned schedule was too laid-back.)
Percent Complete:	76%	(You have completed 76% of the total work.)
Percent Spent:	47%	(The tasks completed to date have used 47% of the total planned effort hours.)
To Complete Performance Index:	0.457	(In order to complete all the work within the original effort estimate, each future hour of effort must accomplish 0.457 hours worth of planned results.)
Improvement Ratio:	-0.718	(In order to complete all the work within the original effort estimate, you can be 72% less productive in the future than you have been in the past.)
Forecast Cost:	181.516	(Based upon your current CPI, the total work is forecast to require 182 hours of effort.)
