

# Earned Value - GOF Project

<b>Planned Completion Date:</b>	Apr 25, 2009	(Based upon the planned time for each task and the planned time in your schedule, you plan to complete the work by Apr 25, 2009.)
<b>Replanned Completion Date:</b>	Apr 27, 2009	(If you were to replan from today, taking into account the amount of time your actual progress has slipped against your original plan, but assuming that your original planned times still hold true for all remaining tasks and time periods, the replanned completion date for the overall work would be Apr 27, 2009.)
<b>Cost Variance:</b>	0.783	(The tasks completed to date have taken 47 minutes less effort than planned.)
<b>Cost Variance %:</b>	39%	(The tasks completed to date have taken 39% less effort than planned.)
<b>Cost Performance Index:</b>	1.644	(Work is taking less time than planned. For every effort hour actually spent, you are accomplishing 1.644 hours worth of planned results. This usually means that your original effort estimate was too big.)
<b>Schedule Variance:</b>	-2.241	(You have completed 2.24 hours less work than you had planned to complete by this date.)
<b>Schedule Variance %:</b>	-53%	(You have completed 53% less work than you had planned to complete by this date.)
<b>Schedule Variance Duration:</b>	-3.913	(Based upon your current rate of task completion to date, it will take you an additional 3.91 days to finish the work that you planned to have completed by now.)
<b>Schedule Performance Index:</b>	0.472	(You are completing tasks more slowly than scheduled. For every effort hour of work you should have accomplished to date, you are completing 0.472 hours. This may mean that your original planned schedule was too aggressive.)
<b>Percent Complete:</b>	6%	(You have completed 6% of the total work.)
<b>Percent Spent:</b>	4%	(The tasks completed to date have used 4% of the total planned effort hours.)
<b>To Complete Performance Index:</b>	0.976	(In order to complete all the work within the original effort estimate, each future hour of effort must accomplish 0.976 hours worth of planned results.)
<b>Improvement Ratio:</b>	-0.406	(In order to complete all the work within the original effort estimate, you can be 41% less productive in the future than you have been in the past.)
<b>Forecast Cost:</b>	20.683	(Based upon your current CPI, the total work is forecast to require 20.7 hours of effort.)
<b>Forecast Cost Range:</b>	20.683 - 20.683	(Based upon the tasks you have completed to date, the total work is likely to require between 20.7 hours and 20.7 hours of effort. (This range estimates 70% probability.))
