Earned Value - GOF Project

|		
Optimized Plan Date:	May 24, 2009	*(If you rebalanced subschedules optimally (so they all plan to complete at the same time), the overall planned completion date would be May 24, 2009.)*
Cost Variance:	19.05	*(The tasks completed to date have taken 19.0 hours less effort than planned.)*
Cost Variance %:	19%	*(The tasks completed to date have taken 19% less effort than planned.)*
Cost Performance Index:	1.234	*(Work is taking less time than planned. For every effort hour actually spent, you are accomplishing 1.234 hours worth of planned results. This usually means that your original effort estimate was too big.)*
Schedule Variance:	16.32	*(You have completed 16.3 hours more work than you had planned to complete by this date.)*
Schedule Variance %:	19%	*(You have completed 19% more work than you had planned to complete by this date.)*
Schedule Variance Duration:	2.909	*(Based upon your current rate of task completion to date, you are 2.91 days ahead of schedule.)*
Schedule Performance Index:	1.194	*(You are completing tasks more quickly than scheduled. For every effort hour of work you should have accomplished to date, you are completing 1.194 hours. This may mean that your original planned schedule was too laid-back.)*
Percent Complete:	33%	*(You have completed 33% of the total work.)*
Percent Spent:	27%	*(The tasks completed to date have used 27% of the total planned effort hours.)*
To Complete Performance Index:	0.913	*(In order to complete all the work within the original effort estimate, each future hour of effort must accomplish 0.913 hours worth of planned results.)*
Improvement Ratio:	-0.26	*(In order to complete all the work within the original effort estimate, you can be 26% less productive in the future than you have been in the past.)*
Forecast Cost:	246.888	*(Based upon your current CPI, the total work is forecast to require 247 hours of effort.)*
Forecast Cost Range:	223.998 - 275.094	*(Based upon the tasks you have completed to date, the total work is likely to require between 224 hours and 275 hours of effort. (This range estimates 70% probability.))*
Optimized Forecast Duration:	46.705	*(If you rebalanced subschedules optimally (so they all complete at the same time), the total work schedule is forecast to be 1.56 months (based upon your current rate of task completion to date).)*
Optimized Forecast Completion Date:	May 14, 2009	*(If you rebalanced subschedules optimally (so they all complete at the same time), the total work is forecast to be completed May 14, 2009 (based upon your current rate of task completion to date).)*
